Bird Box Assembly

Committee: Bird Box Assembly (BBA)

Topic: Survival to the Cults in the Apocalipsis

Written by: Isabella Arango Delgado

Dear Delegates,

Welcome to our SPIS Model of the United Nations 2025! We are delighted that you will participate in this experience! Your committee is the Bird Box Assembly. We expect all our delegates to participate in this exciting debate but also to have fun while practicing their debating skills.

Please feel comfortable to tell us any questions, your Chair are Myriam Treviño your Moderator, Fernanda López your Secretary and I, Isabella Arango your Director.

We hope to see you having fun and enjoying the event as well as your debate.

Good luck!

If you have any questions, feel free to contact us at:

spismunpaseo@sanpatricio.edu.mx

isabellaarangod_a@sanpatricio.edu.mx

Sincerely, Isabella Arango

I. Committee Background

The Bird Box Assembly is a committee that is dedicated to avoiding or even eliminating the epidemic of suicides that are being caused by unknown creatures around the world.

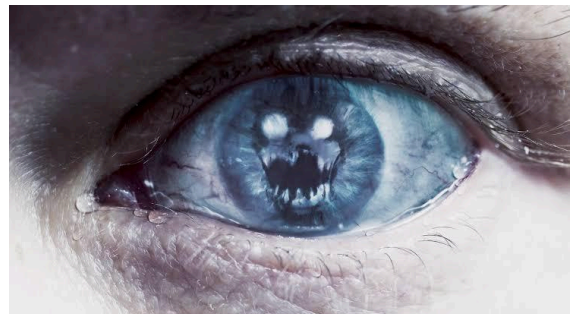

This assembly was created in 2012 to help or stop the waves of suicides that started in Romania, but then the suicides began spreading all over the world, causing chaos and fear among people. The committee was finally established in 2017 when authorities realized the depth of the situation since the suicides started turning massive and almost unstoppable.

The Bird Box Assembly looks for survivors of this epidemic to help them survive these strange creatures and a cult known as "The Seers".

The Assembly wants to discover more information about this cult that apparently is in favor of these creatures and also make sure to stop this massive wave of suicides by keeping survivors safe in a shelter but also looking for new ways to survive this new situation.

II. History of the Topic

It all started in Romania, then, they appeared in Russia, where these unknown entities came into the sight and caused chaos: people suiciding. Eventually, these creatures began to spread more and more Alaska, towards the western coast of North America, then, they went to different parts of the world like Japan, the Korean Peninsula, the Middle East, Europe, Northern Africa, Peru, Colombia, Spain, and finally, all the world. These unknown souls started appearing around 2010, their origin, motives, and emergence are unknown. What is known is that they don't have a physical form, their presence involves a shadowy wind that blows leaves where they pass. Although, these species cannot affect anything physically, only mentally.

People who've seen these creatures almost always describe their encounter with them as an entity that takes the form of your worst fears as well as your greatest sadness or loss. This isn't confirmed since the people who affirm this are people who saw the creatures and they're no longer sane. But what it's known is that creatures can produce human voices to torment their mesmerized victims. This damage negatively affects the mind of the victim.

Any life form possessing sight of these entities is immediately driven to a sense of madness that eventually leads them to suicide, that's why any human who looks at the creatures immediately suffers from huge psychological and physical damage. When people look at the creatures, they enter a trance that is evident in their eyes, which turn gray. As soon as they see these entities they commit suicide by whatever they have on hand or by any means available. But apparently, suicide isn't the only effect these creatures have. When people who already suffer from mental instability see these creatures, they refer to them as "Beautiful" or even "Angels", as if they were a holy creature. These people instead of suiciding, help the creatures to hunt down other humans by persuading them to look at the creatures and not resist them. It is also known, that when these already mentally ill people are affected by the creatures, they hallucinate with people they love but they lost, and what they do is to bring them back to life but what they don't know is that won't happen.

Survivors have discovered some ways to avoid these entities, some of these ways are to put on blindfolds or purposefully blind themselves to find protection. They also use birds, since birds can sense the presence of these creatures. However, birds are not immune to the creatures, they can also end up going insane.

There's a cult of people who are called "The seers", this cult has the capability to look at the creatures without suffering any damage. This group of people is captivated by these entities, they see neither hallucinations of the dead nor monstrous creatures, instead, they see something worthy of admiration, something beautiful. The seers have a mission: To make the ones that don't see the entities, see them and witness their "splendor", which later will cause their suicide and what they consider their "freedom".

III. Current Issues

In Spain, survivors and authorities have been safe in a refugee shelter, isolated from the chaos and danger from the outside. In this shelter they're living in, they're protected since every source of light from the outside is blocked so no one can look outside and risk their lives by getting sight of the killing entities, also they are safe because of the large number of birds on the roof of the shelter to detect if the entities are close or could cause danger. Also, authorities of the shelter are testing the creation of a vaccine that will make people immune to these entities by using blood samples of some members of the cult "The Seers". They managed to capture and analyze their blood to know why they were immune to the creatures.

Recently, "The Seers" have been able to track the missing members of their cult and they discovered the location of the shelter where the rest of the survivors are at. As a result, The Seers got to the shelter, taking the entities with them. As it is known, the birds are not immune to their effects, this is because every living thing that possesses sight of these creatures is led to madness and suicide, as it is happening with the birds. Big numbers of birds are starting to go insane and kill themselves, leaving survivors of the shelter without their protection.

The Seers have taken advantage of this, since they have managed to unblock the source of light of the outside world from the shelter, for example, they're removing the wood and newspaper from the windows, allowing survivors to gaze outside accidentally. Because of this, also a large number of the residents of this shelter have been drowned into madness and end up taking their lives away.

The creation of the vaccines that would help people be immune to the creatures has been paused because of the latest events in the shelter, also, blood samples from the members of the cult have been disappearing as well as some already made-up vaccines, the reasons for the vanishing of these things are unknown, but authorities believe that The Seers have something to do with it.

A wave of panic and dread is being suffered in the shelter by some of the few survivors and authorities.

Authorities know that they can't go out and face "The Seers" because of how the situation is. The Seers have so much power over them by being on the side of the entities, and authorities can't risk their lives. On the other hand, survivors are absolutely terrified, they don't know how or even if they will be able to survive in these new conditions they're living

in, their protection from part of the birds is almost gone now, since very few birds are left, the once blocked sources of light are now unblocked, which means they have more probabilities of seeing the creatures.

Survivors and authorities know that the shelter is no longer safe for them.

IV. UN Action and Resolutions

This situation is happening worldwide, the creatures are ruthless and they don't care to whom they force self-suicide, including members of the UN. The members that are left are totally aware of how these circumstances are quickly leading to the decrease of population in the world and how everywhere around is completely destroyed by the situation, but the UN hasn't been able to do anything about it yet because everything is in chaos and there are barely any survivors left, and going outside or even talking with other people is incredibly dangerous since you don't have a way to know who is part of the cult "The Seers" or who isn't.

Members left of the UN are panicked and desperate to find a way to solve this worldwide issue, although they haven't done anything about it yet, they already have some ideas of what could at least keep survivors alive, since making the entities disappear would be impossible due to their power and circumstances.

The UN members think that creating another shelter for survivors could work, of course, this shelter would be completely isolated and far away from where the last shelter was. They are aware that for survivors to get to this shelter would be completely dangerous since they would be in the outside world without being able to see their surroundings plus the probability of The Seers following them.

UN members also want the few remaining birds to be reproduced to once again have a large number of birds that can provide protection and put the survivors on notice in case the entities or cult are nearby, but again, there's the risk for the birds to start suicide again.

V. Essential Questions

- 1- What are the unknown creatures?
- 2- How did these creatures originate?
- 3- What's the purpose of the creatures?
- 4- How did the creatures expand worldwide and how can they be stopped from spreading?
- 5- Why do some humans perceive them as fear and pain while others as angels and beautiful things?
- 6- What's the purpose of the cult "The Seers"?
- 7- Why does this cult want survivors to see the creatures?
- 8- How can The Seers be stopped?
- 9- How important is it to stop The Seers and why?
- 10- What can be some safe options for surviving?

VI. Conclusion

As the creatures relentlessly claim the lives of millions of people across the world, panic and destruction continue to spread among the remaining survivors. Their reliable warning system that were birds, is no longer the most effective way to keep survivors on alert because of the small amount that is left of the birds, the shelters aren't the safe place for survivors anymore, leaving them desolate, exposed and unprotected of the dangers of the outside world, and principally, "The Seers" are more strong than ever, being a greater threat to the remaining of society. That's why we urgently call upon the delegates to act on this

problem and come up with a solution for the council as soon as possible. We expect you delegates to come up with solutions for keeping survivors safe and protected from this cult that threatens the world, the lives of the survivors rest heavily in your hands.
